Trends of the TPM Excellent Awards and Challenging for the World Class Manufacturing

Recent trends in TPM awards will be discussed from an assessor's point of view, and points that should be used as a reference for TPM activities will be discussed. In particular, the introduction and utilization of TPM by Global companies and the direction of activities toward the World Class Award based on the new TPM Award system revision will be explained. In addition, the importance of KPI and KAI in TPM activities and the relationship between TPM activities and the recent Smart Factory and DX activities will be discussed based on the assessment experience. This presentation is expected to serve as a reference for promoting TPM activities in the future.

- Trends of the TPM Excellence Awards in recent years
- TPM activities in global companies
- Challenging for the World Class Manufacturing
- Concept of KMI, KPI, and KAI
- The potential of data-driven TPM activities
