TPM SPECIALIST CERTIFICATION PROGRAM

Build Credibility with TPM Certification

The TPM Specialist Certification Program gives TPM consultants and in-company promoters a trusted way to demonstrate their knowledge of Total Productive Maintenance. Administered by the Japan Institute of Plant Maintenance—the originator of TPM and organizer of the TPM Awards—the program helps participants build a reliable foundation for promoting TPM correctly. By earning Bronze certification, professionals can show clients, colleagues, and business partners that they have completed structured learning and passed the certification test. This visible recognition supports stronger professional credibility and more confident TPM communication.

Learn TPM Through an Flexible On-Demand Course

The Bronze certification program features approximately 15 hours of English on-demand learning. Participants can access the course materials online within the designated period and learn at a pace that fits their schedule. The curriculum covers essential TPM topics, including TPM implementation, loss analysis, focused improvement, autonomous maintenance, planned maintenance, quality maintenance, education and training, safety, health, and environmental management. This structured approach helps learners develop practical knowledge for supporting TPM activities in manufacturing organizations.

Strengthen Your Professional Value

TPM consultants and in-company promoters play an important role in communicating TPM principles and supporting improvement activities. TPM Specialist Certification helps professionals demonstrate that they have studied TPM through a recognized program administered by JIPM. Certified individuals receive a certification card, and their information can be listed on the JIPM website. This provides a clear, verifiable way to communicate professional status. For consultants, it can support client confidence; for in-company promoters, it can reinforce their role as knowledgeable TPM leaders.

Turn Knowledge into Practical TPM Action

Correct TPM knowledge is essential for achieving sustainable improvement. The program is designed to help participants understand the principles and methods behind TPM, rather than relying on assumptions or incomplete information. After completing the designated course, participants take a certification test covering TPM activities. A passing score of 65 or higher out of 100 is required. Through this learning and assessment process, participants can strengthen their ability to explain TPM, support implementation, and contribute to more consistent improvement activities.

Begin Your TPM Specialist Journey

The Bronze class is the entry point to the TPM Specialist Certification Program. It is available to TPM consultants, in-company promoters, and interpreters who want to establish correct TPM knowledge. The program fee is JPY 300,000, including course attendance and one test opportunity, with a second test available for an additional fee. Start building your expertise through learning developed by JIPM, gain recognition for your TPM knowledge, and take the first step toward becoming a trusted promoter of effective TPM activities.
